PROFESSIONAL SUMMARY

Flutter Developer with professional experience building and maintaining cross-platform mobile applications using Flutter and Dart. Skilled in BLoC, Cubit, Provider, Clean Architecture, REST APIs, Firebase, responsive UI, local data persistence, and reusable Flutter components. Experienced in developing authentication, real-time features, role-based authorization, API integrations, offline data handling, debugging, and performance optimization. Strong understanding of mobile application architecture, state management, UI development, and Git-based development workflows.

PROFESSIONAL EXPERIENCE

Flutter Developer

September 2025 – Present

Codeme Hub International Pvt Ltd

Calicut, India

- Develop and maintain responsive cross-platform mobile applications using Flutter and Dart.
- Build reusable Flutter widgets and responsive interfaces following Material Design and adaptive UI principles.
- Convert Figma designs into responsive Flutter interfaces while maintaining consistent UI and user experience.
- Implement application state management using BLoC, Cubit, and Provider with clear separation between UI and business logic.
- Integrate RESTful APIs using HTTP, asynchronous programming, JSON parsing, and GET, POST, PUT, and DELETE operations.
- Implement Firebase services including Firebase Authentication, Cloud Firestore, and Cloud Storage.
- Implement local data persistence and offline support using Hive.
- Debug application issues, troubleshoot API and Firebase-related problems, and improve application performance.
- Use Git and GitHub for source control and collaborative development within an Agile workflow.

PROJECTS

KERVIA – JOB MARKETPLACE APPLICATION

Live Demo ↗

Flutter, Dart, BLoC, Clean Architecture, Firebase, Firestore, Cloud Storage

- Developed a cross-platform job marketplace application using Flutter and Dart with separate workflows for Job Seekers and Companies.
- Implemented Clean Architecture with Domain, Data, and Presentation layers for maintainable and scalable application development.
- Implemented BLoC-based state management with clear separation of UI, business logic, use cases, repositories, and data sources.
- Integrated Firebase Authentication with OTP and Google Sign-In for user authentication.
- Implemented role-based user flows and separate application experiences for Job Seekers and Companies.
- Used Cloud Firestore to manage users, companies, job seekers, jobs, applications, conversations, and messages.
- Implemented real-time job applications and messaging using Firestore real-time streams.
- Added profile and resume upload functionality using cloud storage services.
- Implemented role-based authorization using Firestore Security Rules, allowing Companies to initiate conversations while Job Seekers can reply.
- Implemented job application tracking and application status management throughout the recruitment workflow.

DRIPSTORE – E-COMMERCE CLOTHING APPLICATION

Live Demo ↗

Flutter, Dart, Provider, REST API, HTTP, JSON

- Developed a responsive e-commerce clothing application using Flutter and Dart.
- Implemented product browsing, category-based discovery, filtering, cart, and wishlist functionality.
- Used Provider for application state management and separation of UI state from business logic.
- Integrated REST APIs using HTTP requests, asynchronous programming, and JSON data handling.
- Implemented discount handling, order summary, address validation, and simulated checkout functionality.
- Designed responsive mobile interfaces for a consistent user experience across different screen sizes.

TECHNICAL SKILLS

Programming Language: Dart **Mobile Development:** Flutter, Cross-Platform Mobile Development, Responsive UI, Adaptive UI, Material Design, Cupertino **State Management:** BLoC, Cubit, Provider **Architecture:** Clean Architecture, Modular Architecture, MVVM, Separation of Concerns, Reusable Components **Backend & APIs:**

Firebase Authentication, Cloud Firestore, Firebase Cloud Storage, RESTful APIs, HTTP, JSON, Third-Party API Integration
 Local Storage: Hive, Shared Preferences, Offline Data Persistence
 Development Practices: Clean Code, Debugging, Troubleshooting, Performance Optimization, Mobile Application Lifecycle, Agile Development
 Tools: Git, GitHub, Postman, Android Studio, Visual Studio Code, Figma

EDUCATION

Bachelor of Commerce (B.Com) – Computer Application
 2022 – 2025
 Kannur University

CERTIFICATION

Flutter Developer Internship Certificate
 Codeme Hub International Pvt Ltd
