PROFILE

Flutter Developer with hands-on experience developing and maintaining cross-platform mobile applications using Flutter and Dart. Experienced in building scalable e-commerce, healthcare, finance, and job marketplace applications using Firebase, RESTful APIs, and local data persistence. Skilled in responsive and adaptive UI development, BLoC, Provider and Cubit state management, authentication, real-time features, role-based access control, offline-first functionality, and mobile application performance optimization. Strong understanding of Clean Architecture, clean and reusable code, debugging, maintainability, and Agile development practices.

PROFESSIONAL EXPERIENCE

Flutter Developer

09/2025 – Present

Codeme Hub International Pvt Ltd

Calicut, India

- Developed and maintained cross-platform mobile applications using Flutter and Dart, delivering responsive UI and smooth 60fps performance across mobile devices and screen sizes.
- Designed and implemented scalable, reusable features in collaboration with UI/UX designs, converting Figma mockups into pixel-perfect Flutter interfaces and responsive layouts.
- Implemented state management using Provider, Cubit, and BLoC architecture principles, maintaining clear separation between UI logic and business logic.
- Integrated RESTful APIs with asynchronous HTTP handling and implemented complete API workflows including GET, POST, PUT, and DELETE operations.
- Worked with Firebase services including Firebase Authentication, Cloud Firestore, and Firebase Storage for authentication, real-time data, profile media, and cloud-based application functionality.
- Implemented local offline data caching using Hive NoSQL, reducing unnecessary network requests and supporting reliable offline-first application functionality.
- Debugged application issues, troubleshooted UI and application functionality, and optimized mobile performance through efficient Flutter widgets and reusable architecture.
- Developed clean, reusable, and maintainable Flutter components while following responsive and adaptive mobile design principles.
- Collaborated in an Agile development environment, participating in sprint activities, code reviews, debugging, and maintaining version-controlled code using Git and GitHub.

PROJECTS

1. DripStore – E-Commerce Clothing App

Flutter, Dart, Provider, REST API

- Developed a full-featured fashion and apparel e-commerce mobile application with a responsive product discovery and shopping experience.
- Implemented category-based browsing, dynamic product filtering by size, color, price range, and brand, along with multi-image product carousels.
- Built interactive shopping cart and wishlist functionality with reactive state updates, product calculations, and discount handling.
- Implemented order summary workflows, shipping address validation, and simulated checkout functionality using clean and modular Flutter architecture.
- Integrated RESTful APIs and asynchronous data handling for dynamic product and application data.

2. Kervia – Job Marketplace App

Flutter, Dart, Clean Architecture, BLoC, Firebase

- Built a cross-platform job marketplace application using Flutter and Dart with Clean Architecture and BLoC, supporting complete job seeker and company workflows.
- Implemented Firebase Authentication with OTP and Google Sign-In, along with Cloud Firestore and Cloud Storage for user profiles, resume uploads, job applications, and real-time messaging.
- Developed real-time job application and messaging functionality using Cloud Firestore, enabling communication between job seekers and companies.
- Designed role-based messaging permissions using Firestore Security Rules, allowing companies to initiate conversations while restricting job seekers to replying and enforcing authorization at the backend level.

3. Real-Time Blood Donation Application

Flutter, Dart, Firebase Auth, Cloud Firestore, Firebase Storage

- Built a community healthcare mobile application connecting blood donors with recipients across regional networks.
- Implemented Firebase Authentication for secure phone/email authentication and Firebase Storage for donor profile media.

- Integrated Cloud Firestore real-time snapshot listeners to instantly broadcast urgent blood requests and donor availability status.

4. Personal Expense Tracker App

Flutter, Dart, Hive Database, Provider

- Developed an offline-first financial tracking application allowing users to log, categorize, edit, and analyze daily income and expense transactions.
- Implemented Hive NoSQL local persistence with Provider-based state management for fast read/write operations and offline access.
- Built interactive spending charts and monthly financial breakdown reports to provide data-driven user insights.

5. Nykaa E-Commerce UI Clone

Flutter, Dart, Responsive Design, Custom Widgets

- Designed and developed a pixel-perfect e-commerce shopping interface inspired by Nykaa, including dynamic hero banners, brand showcases, and category listings.
- Engineered reusable UI components and responsive, adaptive layouts for consistent presentation across phone and tablet screens.

SKILLS

Programming Languages: Dart

Mobile Development: Flutter, Cross-Platform Mobile Development, Responsive UI, Adaptive UI, Material Design, Cupertino

State Management: BLoC, Cubit, Provider

Architecture: Clean Architecture, Modular Architecture, Reusable Components, Separation of Concerns

Backend & Cloud Services: Firebase Authentication, Cloud Firestore, Firebase Storage, RESTful APIs, JSON Parsing, Third-Party API Integration

Databases & Local Storage: Hive NoSQL, Shared Preferences, Offline-First Data Persistence

Development Practices: Clean Code, Debugging, Troubleshooting, Performance Optimization, Mobile Application Lifecycle, Agile Development, Responsive Design

Version Control & Tools: Git, GitHub, Postman, Android Studio, VS Code, Figma

EDUCATION

B.Com Computer Application

Kannur University

CERTIFICATIONS

- Flutter Development (Internship Certificate) – Codeme Hub International Pvt. Ltd.
- BCom (Bachelor of Commerce) – Kannur University
